BomberGirl and the Mechanic is the deep beat driven sounds of electronica mixed in luscious, expansive symphonic orchestrations—a fusion of organic and synthesized soundscapes melting away boundaries under the heat of BomberGirl's voice. BomberGirl is inspired and surprising, whether it be poetic vocals both sultry and powerful, lavishly choreographed dance to electro-pop or a neon world inhabited by Zeppelins floating on currents of voice. Cameos and unique couplings abound in a BomberGirl show: characters leap, slide and slip away into subterranean caverns, or emerge over an arboreal canopy gliding on mechanical wings. BomberGirl flights bring a colorful and eclectically costumed dance troupe and animated stories projected into spaces...The stage is set and the dancers poised...Swirls of sound and sight fill the stage with excitement as eye and ear candy flood in a variety of delicious flavors.
